

Oracle EBS to NetSuite ERP Transformation Accelerator

Transition Your Enterprise Systems to NetSuite Faster with less effort.

The Business Challenge

Migrating from Oracle EBS to NetSuite ERP is a complex, time-consuming process that often leads to data inconsistencies, having qualified resources available, which cause delays. Organizations struggle with mapping intricate data structures, data integrity, and maintaining business continuity during the transition.

The lack of specialized tools often result in prolonged project timelines, and increased costs to build out the routines to properly extract the data.

The Solution

The Oracle EBS to NetSuite Transformation Accelerator by Jade Global is an advanced solution engineered to expedite the transition from Oracle EBS to NetSuite. Leveraging Jade's Oracle EBS and NetSuite experience, Jade developed a tool that utilizes a precise sequence of data mapping, cleansing, transformation, extraction, and loading. This accelerator minimizes manual intervention and mitigates the risk of errors, while reducing the time required for performing the data migration activities. Equipped with pre-built connectors for critical master and transactional data with customizable migration templates, it performs a seamless, efficient, and accurate data migration process.

Business Benefits to Business

Don't Let Migration Anxiety Hold You Back – Experience an Easy and Cost-Effective Transition to NetSuite.

- Migration timeline reduced by up to **50%**
- Migration cost slashed by up to **30%**
