Jade SCM AI Insight

Your Intelligent Partner to a Resilient Supply Chain.

Accelerate implementation of advanced analytics in NetSuite Analytics Warehouse- 40% Lesser Costs and 50% Lesser Efforts.

The Business Challenge

Disparate systems and legacy analytics tools can obscure your 360-degree view of supply chain data and hinder strategic decision-making. This can lead to inventory discrepancies, inefficient supplier onboarding, missed market opportunities, and low customer satisfaction. You know that advanced analytics is the solution, but the anxiety of high costs and extended implementation timelines might hold you back.

The Solution

Jade SCM AI Insight is an AI-powered solution that accelerates the implementation of advanced supply chain analytics in the NetSuite Analytics Warehouse (NSAW). It also simplifies complex NSAW implementation with multiple data sources and seamlessly migrates historical data from ERP systems. By providing a single version of the analytical "truth" for the business users, it drives efficiency, reduces costs, manages risks, and enhances strategic decision-making in supply chain processes.

Benefits to Your Business

- **360° view** of supply chain through AI dashboards
- **Up to 40%** cost savings with actionable analytics
- **Up to 20%** more accurate customer demand forecasting
- **Up to 10%** increment in customer retention with optimized supply chain workflows

About Jade Global

Jade Global is a long-standing NetSuite partner and a Three-time Spotlight Partner Award Winner, delivering ERP Transformation projects, NetSuite Analytics Warehouse implementation projects, optimization services, and managed services. Our NetSuite-certified experts have built SCM AI, leveraging 20+ years of industry experience and a team of 600+ ERP Consultants. We have delivered 1000+ ERP Transformation Projects and built 20+ Solutions and Accelerators.

How is the solution different?

- **Artificial Neural Network (ANN)-based Machine Learning** provides comprehensive insights and predictive capabilities from your key supply chain data.
- **Prebuilt ETL adapters** seamlessly integrate and retrieve data from systems like with Oracle EBS , Peoplesoft, JdEdwards and other cloud Supply Chain platforms.
- **Ready-to-use dashboards and reports** for effective analysis and planning of your key Supply Chain KPIs.
- **Scalable deployment** of advanced analytics through integration with Oracle Autonomous Data Warehouse and Oracle Analytics Cloud.
- **Robust data security** inherited from NetSuite Analytics Warehouse, ensuring data protection and compliance.
